PROJECTS

Cyber Threat Monitoring Dashboard *React · FastAPI*

Full-stack security monitoring application built during academic coursework to track and visualise real-time threat data.

- Designed and developed a React-based frontend to display live threat feeds with clean, intuitive UI components.
- Built RESTful API endpoints using FastAPI to handle data ingestion, filtering, and retrieval with low latency.
- Implemented data management workflows to update and maintain monitoring records, improving overall system reliability.

- Gained hands-on experience with frontend-backend integration, API testing, and deployment workflows.
